

## Consumer Products – Food & Beverage

Oracle Business Accelerator for Oracle E-Business Suite Release 12

# What is an **Oracle** Business Accelerator?

- Next generation tools for rapid, precise implementing
- Automatically configures EBS using business flows defining leading industry practices
- Optimized for ease of use with self-service education
- Goal is rapidly configured baseline
- Transaction testing can begin in hours
- Highly structured, prescribed method minimizes impact due to varying implementation skills

# Basic Facts

- 27 Flows, 36 Modules
- 100% Oracle E-Business Suite Release 12 code line installed via Rapid Install utility
- No JDE, PeopleSoft or third party connectors
- Linux certified
- Not a pre-configured clone, but a true setup wizard
- One tool with market, industry, country variations
- Works only for net-new Oracle license situations
- No restrictions on adding more modules

# New in R12 Accelerators

## Consumer Products – Food & Beverage

### Financials

- **Assets:** Automatic Depreciation Rollback
- **GL:** Account Analysis & Drilldown; Improved Legal Entity support
- **Web Applications Desktop Integrator:** for Assets & General Ledger
- **Internet Expenses:** Enhanced UI for Expense Report Audit
- Enhanced Transaction Tax aligned with Legal structure
- **Receivables:** AR Refunds via seamless Payables integration
- **Payables:** Invoice Lines model improvements; Automated AP/AR Netting
- Integration with E-Business Tax

### Sales

- **Territory Management :** Improved Territory Administration Support

### Process Manufacturing

- **Product Development:** Least Cost Formulation and Stability Studies
- **Process Execution:** Reservations/Detailed Allocations, Picking, Move Orders
- **Process Manufacturing Operations:** Pre-Weigh/Dispensing
- **Advanced Supply Chain Planning:** Support for comprehensive Planning Detail Report

### Supply Chain Management

- **Purchasing:** Buyer's Work Centre; Usage of Requisition Template
- **Inventory:** Converged Inventory, Picking Rules, Material Status

ORACLE®

# Industry Features

- End-to-end Design-To-Produce manufacturing processes using Process Manufacturing
- Compliance for important EU and US FDA regulations demonstrating Traceability, E-Signatures, Stability Studies and Quality Management
- Channel Management using Trade Management to manage promotions, deductions and claims from retailers, distributors and partners
- Collaborative Supply Chain Management featuring Collaborative Planning, ASCP, Demand Planning and Inventory Optimization
- Supports UK Specific Country Requirements such as VAT, Movement Statistics and BACS Payment Format

# Key Features

## So What? How can this answer the business challenge?

The Spearhead	The Industry Challenge	The Oracle Business Accelerator Answer
<b>Drive Efficient Food Safety &amp; Compliance</b>	Stricter regulations on traceability and reporting on food quality and safety; Safety concerns erode consumer confidence	<b>Leading-practice manufacturing and purchasing processes with sampling and quality issue management nonconformance and corrective action management delivered through Process Manufacturing, Purchasing, ERecords</b>
<b>Drive Effective and Efficient Trade Processes</b>	Trade Promotion is a grossly inefficient process. Industry experts agree that a very conservative estimate of 20% of expenditures are wasted and add nothing to the bottom line	<b>Best-in-class sales and channel management with global forecasting and promotions, deductions and claims management using Field Sales and Trade Management</b>
<b>Enable The Adaptive Collaborative Supply Chain</b>	Out-of-stock conditions are a major inhibitor to top line revenue growth. Failure to align demand with production results in excess inventory or shortages at the retail shelf	<b>World-beating advanced forecasting, planning and supply chain management through Collaborative Planning, Advanced Supply Chain Management, Demand Planning, Cost Management, Inventory Optimization</b>
<b>PLUS! Oracle's World Class Financials products. Including General Ledger, Payables, Receivables, Cash Management, Assets, Internet Expenses</b>
